

# IVALIFE Insurance Limited

## FACT SHEET - CONSERVATIVE STRATEGY AS AT 30/06/2023

### INVESTMENT OBJECTIVES

The IVALIFE Conservative Strategy seeks long-term total returns through a conservative investment strategy comprising predominantly fixed interest securities. The fixed interest securities will be geographically spread to ensure maximum diversification.

### PORTFOLIO STRATEGY

The IVALIFE Conservative Strategy takes a long-term strategic approach to asset allocation across different asset classes, with the main aim being to preserve capital over the long term. This Strategy invests in a select number of funds where the underlying assets are a mix of fixed interest instruments. Between 80% and 90% of the assets of this Strategy are invested in investment grade corporate and highly rated sovereign bonds, in various countries and industries, with minimal to no exposure to equities to maintain stable returns. Hedging is used to mitigate the risk of foreign exchange. The IVALIFE Conservative Strategy aims to preserve the value of the capital by investing in lower risk bond funds, whilst taking advantage of some growth opportunities in the market. The asset allocation will reflect the market outlook which may also include holding high cash levels from time to time.
